

Under the Federal Clean Water Act, Metro Nashville is charged with enhancing and protecting the quality of Davidson County's waterbodies and streams, and improving stormwater discharges that flow directly from our storm sewers to waterways during rain events?

WE NEED YOUR HELP to identify and report any issues you might witness.

Only clean stormwater should be allowed to be washed into our storm sewer systems and/or local streams! Below are examples of violations:

Wash water off parking lot

Uncapped dumpster flowing into drain

Trash/debris from construction site

Washing near/over catch basins

Sediment from construction site

Illicit discharge from restaurant into catch basin

If you see an illicit discharge or a pollutant that might be washed into a storm sewer or stream during a future rain event, please contact the NPDES Program Office at

615-880-2420 or 313-PURE.

Thanks for not only helping Metro maintain permit compliance, but also helping to improve the water resources within your community.
